

Your generosity can make the vision a reality.

CLEAR CREEK COUNTY COLLABORATIVE CARE CENTER

VISION: To provide excellent and convenient care for all.

~ A Healthy Community is a Thriving Community ~

Studies show and healthcare providers can tell you that those with the greatest need for services rarely do more than emergency room visits because they don't know how to ask for the assistance they need.

By providing physical, mental, behavioral healthcare services, and access to State and Federal eligibility programs all under one roof, our residents will have the resources needed to achieve the health and well-being necessary to live productive lives.

Having care close to home means less driving, more convenience and more cost-savings for patients.

We are growing. Clear Creek County is embarking on several developments that will attract new families to our communities. Primary Healthcare services are a key determinant in the viability and health of a community.

It is estimated that the clinic will have 15,000 patient visits annually, saving our residents — and our environment — \$2,500,000 in gas and 112,500 hours of drive time over the next 10 years.

Make the vision a reality — your contribution of any amount will help.

**And by making a year-end donation now, you can have an even greater impact —
the Colorado Health Foundation will match your donation dollar for dollar up to 1 million dollars!**
